

CMA-PCP Task Group Meeting Notes
NFRC Membership Meeting - Austin, Texas
3/5/3007

Note taker: C.R. Wagus

There was discussion and resolution of negatives and approval with comments on recent ballot.

Comments will be addressed in 3 groups by subject. Resolution recorded by NFRC staff as they were discussed.

- G. Curtis will check with legal counsel on 2 years or 4 years for record retention.
- Keep placeholder to technical references until technical document approved.
- General comments addressed and resolved in section 1 of attached spreadsheet.
- Acronyms will be used after 1st occurrence and list of acronyms will be put in Appendix.
- Second section on P & E comments approved.
- 100% review by IAs of Manufacturer/other ACE calculations required by BOD until program has proven track record. BOD members present reaffirmed direction provided by BOD and to reassess this requirement in the future.
- Issues on fee schedules were found not germane because BOD has sole purview over fees. Section removed because of NFRC decision to publish separate fee schedules for all programs.
- Requirement for IG certification addresses quality assurance issues, not calculations for rating. If NFRC determines that IGU certification is desirable, Section 1.2.2.C will be removed. Section 1.2.3.2.1 note will be checked by staff for intent.
- Section 2.2 suggested revision passed out to address “Spacer and Sealant” issue and comments.
- Tony Rygg commented that term “ACE” is widely used and suggested the term “NFRC ACE” be used instead.
